

DID YOU TEST POSITIVE FOR COVID-19?

Please use the following decision tree to comply with Milwaukee County's COVID-19 mitigation procedures.

* If you have access to antigen tests, you should consider using them. With two sequential negative tests 48 hours apart, you may remove your mask sooner than day 10

Note: If your antigen test results are positive, you may still be infectious. You should continue wearing a mask and wait at least 48 hours before taking another test. Continue taking antigen tests at least 48 hours apart until you have two sequential negative results. This may mean you need to continue wearing a mask and testing beyond day 10

** Regardless of when you end isolation, avoid being around people who are more likely to get very sick from COVID-19 until at least day 11. Remember to wear a high-quality mask when indoors around others at home and in public and not go places where you are unable to wear a mask until you are able to discontinue masking
